LOKESH VADDEPALLY

Vancouver, BC, Canada | +1 236-862-5987 | vaddepallylokesh362@gmail.com | linkedin.com/in/lokesh-vaddepally-32a69a212

PROFESSIONAL SUMMARY

Full Stack Developer with ~3 years of professional experience across .NET/C# and React-based web applications, currently based in Vancouver, BC with full Canadian work authorization (no sponsorship required). Recently completed an M.S. in Information Systems (Northeastern University). Hands-on experience building production-grade full stack features (ASP.NET Core, React JS/React 18, Node.js) plus self-directed, in-depth study of system design fundamentals — scalability, caching, database replication/sharding, message queues, and API design — applied to real Canadian project work.

TECHNICAL SKILLS

Programming & Web Technologies: ASP.NET Core, C#, Java, JavaScript (ES6+), TypeScript, React JS/React 18, HTML5, CSS, Bootstrap, Tailwind CSS, Node.js, Express

Architectural Patterns & Frameworks: MVC (Model-View-Controller), Swing, REST API design

Database Technologies: SQL Server, Oracle SQL, PL/SQL, PostgreSQL, MongoDB, Firebase, Supabase

System Design: Load balancing (L4/L7), caching strategies (cache-aside, write-through/back, TTL & eviction), database replication & sharding, CAP theorem, message queues (RabbitMQ), REST vs GraphQL vs gRPC, WebSockets, DNS, elasticity/cloud infrastructure

Cloud & Version Control: Azure, Azure DevOps, Git, Vercel

Dev, Debugging & Automation Tools: Visual Studio, VS Code, Postman, Playwright, NetBeans, Batch Scripting (basic), Remedy

Practices & Other Skills: Agile/Scrum, SDLC, Incident Management, Debugging, Problem Solving, Offshore-Onshore Collaboration

PROFESSIONAL EXPERIENCE

Full Stack Developer **Dec 2021 – Sep 2024**

Tata Consultancy Services — Infineon Technologies (Client) *Hyderabad, India*

- Developed and maintained full stack features for the Infineon client engagement using ASP.NET Core, C#, and React JS, working within Agile/Scrum sprints tracked through Azure DevOps.
- Built and consumed REST APIs backed by SQL Server, collaborating with cross-functional teams on feature design and delivery.
- Performed API validation and cross-browser UI testing using Postman and Playwright to ensure release quality.
- Took leave without pay from September 2024 to relocate to Canada for full-time graduate studies; remains a TCS associate exploring re-fitment opportunities.

CANADA-BASED PROJECTS

AHS — Home Services Marketplace (Capstone Project) *Vancouver, BC*

React 18, TypeScript, Tailwind CSS, Vite, Supabase (PostgreSQL, Auth, Realtime, RLS), React Query, React Router, Google Maps API, Vercel

- Built a full stack marketplace connecting homeowners, tenants, and property managers with verified home service professionals across Canada.
- Developed role-based dashboards for seekers, providers, and business accounts, including service request workflows (pending, accepted, completed, cancelled) with payment tracking.
- Implemented provider discovery/service catalog search by province, city, and category, a real-time messaging system, and Supabase Authentication wired into a global app context; deployed to Vercel.

Healthcare Plan Management REST API

Node.js, Express, RabbitMQ, Elasticsearch, JWT/OAuth2 (Google, RS256), Ajv, Postman

- Designed a schema-validated (Ajv), OAuth2/JWT-secured REST API, applying message queue (RabbitMQ) and search indexing (Elasticsearch) concepts that reinforce the system design fundamentals listed above.

Task Manager — ASP.NET Core MVC (Academic Project) *Northeastern University*

ASP.NET Core MVC (.NET 8), C#, Entity Framework Core, SQL Server/MySQL, GitHub Actions, Azure App Service

- Built a layered task management web app (separate MVC and Data Access class library projects) with role-based access control (Manager vs. Employee), custom authorization filters, and session-based authentication with secure password hashing.
- Implemented task CRUD with comments, file attachments, notifications, and a full task history/audit trail, plus reusable custom Razor Tag Helpers (priority badges, progress bars, status badges).
- Set up a CI/CD pipeline with GitHub Actions to build, publish, and deploy the app to Azure App Service.

EDUCATION

M.S. in Information Systems — Northeastern University May 2026

Vancouver, BC, Canada — GPA 3.4/4.0

B.Tech in Civil Engineering — Malla Reddy Institute of Technology GPA 7.3/10

CERTIFICATIONS

SQL – MySQL for Data Analytics • Introduction to OpenAI API • The Complete Prompt Engineering for AI Bootcamp
