PROFESSIONAL SUMMARY

Full Stack Developer with 3 years at Tata Consultancy Services and Canadian experience as a Software Developer at Aisha Home Services, building web applications in React, TypeScript, C#, and ASP.NET Core over SQL Server and PostgreSQL. Works across the stack: React front ends (Redux, React Query), REST APIs in ASP.NET Core and Node.js (OAuth2 / JWT), schema design, automated testing, and CI/CD (Azure DevOps, GitHub Actions). M.S. in Information Systems (Northeastern University). Full Canadian work authorization; no sponsorship required.

TECHNICAL SKILLS

Languages: C#, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Front End: React 18, Redux, React Query, React Router, KnockoutJS, Tailwind CSS, Vite
Back End: .NET 8, .NET Framework 4.x, ASP.NET Core (MVC, Web API), Entity Framework Core, REST APIs, Node.js, Express
Databases: SQL Server, PostgreSQL (Supabase), Oracle SQL / PL/SQL, MongoDB, Firestore
Security & Messaging: OAuth2 / JWT, Row Level Security (RLS), RabbitMQ, Elasticsearch
Testing & Quality: Unit, integration, and end-to-end testing (Playwright, Postman), cross-browser debugging, code reviews
DevOps & Cloud: Azure DevOps, GitHub Actions (CI/CD), Microsoft Azure App Service, Vercel, Git, GitHub
Practices: Agile / Scrum, object-oriented design, refactoring and technical-debt reduction, technical documentation

PROFESSIONAL EXPERIENCE

Software Developer (Capstone) | Aisha Home Services (AHS), Ottawa, ON **Jan 2026 – Apr 2026**

Full-stack marketplace connecting homeowners, tenants, and property managers with verified home service professionals across Canada

- Developed React 18 / TypeScript features, including role-based dashboards for service seekers, individual providers, and business accounts, in a multi-role user system with protected routes and context-aware navigation.
- Built service-request workflows (pending, accepted, declined, completed, cancelled) with service logs and payment tracking.
- Built Supabase (PostgreSQL) backend services for auth, profiles, messaging, and notifications, secured with Row Level Security.
- Contributed to schema design across 11+ tables, including migrations, foreign keys, ENUM types, performance indexes, and triggers.
- Implemented real-time in-app notifications (Supabase Realtime) and location-based service discovery with Google Maps API.
- Worked in a Git branching workflow, wrote technical documentation, and helped deploy to Vercel with a production Supabase backend.

Full Stack Developer | Tata Consultancy Services (Client: Infineon Technologies), Hyderabad, India **Dec 2021 – Sep 2024**

- Developed and maintained full-stack web applications in C#, ASP.NET, and ASP.NET Core across .NET Framework 4.x and modern .NET, with React and KnockoutJS front ends and SQL Server data access, working across the stack within a Scrum team.
- Refactored legacy C# services in a production codebase using object-oriented design to cut technical debt and improve testability.
- Designed, built, and consumed REST APIs and web services (JSON over HTTP) with OAuth2 / JWT authentication and data-privacy controls.
- Fixed production defects across C#, JavaScript, and SQL, progressing from guided tasks to owning scoped features end to end.
- Wrote unit, integration, and end-to-end tests (Playwright, Postman), did cross-browser debugging, and took part in code reviews.
- Turned designer and product manager requirements into technical designs, delivering in Scrum sprints on Azure DevOps with CI/CD.

PROJECTS

FinanceTracker — Commercial Personal-Finance App (Independent, 2026) | *TypeScript, Capacitor, Firestore, on-device OCR; iOS, Android, web*

- Building a commercial budgeting app solo, from product research and architecture through implementation and app-store release prep.
- Built a multi-currency financial data model, CSV import for Canadian bank statement formats, and recurring-transaction detection, and worked through PIPEDA, BC PIPA, and GDPR privacy requirements, weighing server-side against on-device processing.

Task Manager — ASP.NET Core MVC Web Application | *.NET 8, C#, Entity Framework Core, SQL Server, GitHub Actions, Azure App Service*

- Built a layered app (separate MVC and data-access projects) with role-based access control, custom authorization filters, hashed-password session auth, an audit trail, and Razor Tag Helpers; deployed to Azure App Service via GitHub Actions CI/CD with unit tests.

Healthcare Plan Management API — Secure, Event-Driven REST API | *Node.js, Express, RabbitMQ, Elasticsearch, OAuth2 / JWT (RS256), Ajv*

- Built a schema-validated REST API with Google OAuth2 / JWT (RS256), ETag conditional requests, and a RabbitMQ-to-Elasticsearch pipeline.

EDUCATION

M.S. in Information Systems | Northeastern University, Vancouver, BC | GPA 3.4 / 4.0 **May 2026**

B.Tech in Civil Engineering | Malla Reddy Institute of Technology, Hyderabad, India **Jul 2021**
